# The Network of Big Data Centers of Excellence in Europe is up and running

s of Excellence in Europe join forces  
collaboration.

asure to attend the iKnow-the Data-  
Brazil, and to witness an excellent project  
Network of National Big Data Centers of

an only cover a small part of the whole  
their competences can define the data-

of Excellence (CoE) Network will be  
can be transferred into relevant

tive already decided on the next steps:  
achievements of each center, define big  
basis, and align with other European

┌

discussed at the conference were data for Europe's Digital Transformation. This is the big data community. The new Network promotes educational collaboration.

A really insightful paper about [Nurturing SMEs Digital Transformation](#). It contains 4 case studies of SMEs engaged in digital transformation.

They face the same problem: how to cope with the lack of digital skills? The paper shows concrete solutions from 4 companies.

For the same problem, more help is at hand, via the [European Data Science Academy](#), which provides a platform to develop the needed data skills, promote [data science training](#) and provides courses and Open Online Courses (MOOCs) for self-

learning. Where collaboration between Europe's Big Data Centers contributes to the economy and society.

At last, every player is on board. 30 Big Data

oe have already enrolled. But there are  
yet.

Center of Excellence I urge you to join  
ion round of the network is held at [BDVA](#)
